

Integrated Management System

Annex Policy of the Apator Group Energy Management System (ISO 50001)

In the field of energy management in the Apator Group, it is crucial to carry out optimal energy management while ensuring the highest quality of offered products and services within the framework of sustainable development.

We strive to improve the energy efficiency and safety system by managing energy in accordance with the requirements of the ISO 50001:2018 standard and taking into account care for the environment, so that it is fully integrated with the activities and business processes, enabling them to be conducted in a reliable and responsible manner.

For that purpose, as part of the Integrated Management System, the Energy Management System has been established, implemented, maintained and continuously improved in accordance with the requirements of the ISO 50001:2018 standard.

We achieve our objectives by:

- ✓ improving the energy result and continuous improvement of the energy management system,
- ✓ setting, implementing and regularly reviewing energy targets related to the improvement of the energy result,
- ✓ providing the resources and information needed to achieve the set energy targets and continuous improvement of the energy management system,
- ✓ complying with all legal requirements and our other obligations concerning energy efficiency and energy management,
- ✓ taking into account energy efficiency in the process of purchasing equipment, products and services in areas where it affects the Company's energy result,
- ✓ taking energy efficiency into account in the design of new, modified or renovated facilities, equipment, systems as well as energy-using processes that may have a significant impact on their energy performance during their planned or expected life cycle,
- ✓ constant improvement of employee qualifications and awareness, taking into account their role and commitment to the tasks performed in the area of efficient energy use,
- ✓ strengthening the culture of optimal energy use in the Company by promoting energy efficiency improvement among the employees.

Based on the framework of this policy, the management ensures sufficient resources for the effective functioning of the Energy Management System, sets specific operational objectives for energy management on an annual basis and commits to the continuous improvement of the Energy Management System.

The Energy Management System Policy (ISO 50001) is known to all employees. They are responsible for adhering to it and applying it in their daily activities.
