

An international group of manufacturers of measuring devices and systems, providing solutions for the automation of power grid operation. Developing solutions for RES and in the field of automation and robotization for industrial enterprises.

**11** companies in the Group

**9** production facilities

about **2400** employees

**7** R&D offices

## Our market position

distribution of products to more than **60 countries**

**leader** on the Polish market

strong market position **EMEA**

## Business Units and their share in revenues

electricity

**41%**

### Solutions:

- metering devices - electricity meters
- innovative energy management systems
- devices for energy distribution and electrical circuit protection
- systems and solutions supporting work related to the management, operation and supervision of power grids
- IT systems supporting measurement data management
- network asset management solutions

### Customers:

- distribution system operators (DSO)
- electricity wholesalers, electro-assembly and electro-installation companies
- designers, engineers
- construction, industry, railway
- New customer groups:
  - entities operating in the RES
  - individual prosumers
  - solution providers for the electromobility sector

### Production scale (per year):

**1.5 million** electricity meters  
**0.8 million** disconnectors

water & heat

**33%**

### Solutions:

- measuring devices - residential and industrial water meters, heat meters
- heat cost allocators
- remote reading, utilities consumption settlement services and water and heat distribution system management

### Customers:

- water supply and heat companies
- housing cooperatives
- construction
- industry

### Production scale (per year):

**3.0 million** water meters

gas

**26%**

### Solutions:

- measuring devices - residential and industrial bellows gas meters
- smart gas meters with remote data readout function and a system that enables the suspension and resumption of gas supply (GSM mobile network)

### Customers:

- institutional customers and gas distributors

### Production scale (per year):

**1.5 million** gas meters

## Mission

### Today...

our technologies enable the management of valuable natural resources and support innovative energy companies in meeting the challenges of the energy transformation.

Our mission is to disseminate advanced technologies among entrepreneurs and society. We create tomorrow's solutions for active and informed market participants who care about the environment, the planet, and future generations so that we can all independently produce, manage, share green energy and take care of natural resources.

**Green technology**  
for your business and home

## Values of the Company

### Responsibility

- we keep our word
- we always provide products and services in the quality and time expected by our clients, partners and associates
- we are fully involved in the undertaken actions

### Cooperation

- we are a team
- we openly and closely cooperate to achieve the organization's goals
- we respect our partners and associates

### Development

- we actively seek for and implement new solutions and breakthrough innovations
- we constantly develop our competencies

### Agility

- we are open to changes
- we cleverly and efficiently adapt our actions to the needs of the market and organization
